Re: Associated Builders & Contractors  
Excellence in Construction Awards  
Westmoreland Electric Letter of Recommendation  
Slippery Rock University Student Housing – Phase One

Dear Mr. Impink:

I am writing this letter to commend the work that Westmoreland Electric performed at the recently completed Slippery Rock University Student Housing project for BRIDGES / Mistick Construction. The electrical and telecommunications work that your company performed was completed with the highest of quality, on time and within budget. These qualities are the standards that the Associated Builders and Contractors believe in and that all Merit Shop contractors strive for. Westmoreland Electric not only achieved these standards, they exceeded them!

Your staff and field personnel always cooperated with our management team to meet our aggressive construction schedules. They always worked with safety as the highest priority while still performing to a high level of quality. The lines of communication between your company and the other contractors, the University, the architect/engineer and the developers were always open, honest and with the best interests of the project in mind. A large project like this with such a tight schedule can be very demanding, especially on an electrical contractor. Your company performed flawlessly.

It was a pleasure to work with your firm on this student housing project as well as the second phase that you are performing presently with us. I would highly recommend that your entry of this project for the Associated Builders & Contractors Excellence in Construction Awards be strongly considered!

I would be more than happy to speak to anyone on your behalf concerning this project.

Sincerely,

Glenn A. Gates  
Principal / President / Sr. Project Manager
