Re: Slippery Rock University Foundation
New Student Housing - Phase 1
WTW Project No. 70-4097

Dear Gary:

WTW Architects is pleased to write this letter of recommendation regarding Westmoreland Electric, Inc.'s work completed on the 1,390 bed Slippery Rock University Foundation New Student Housing – Phase 1. Westmoreland Electric worked well with all project team members in a professional and cooperative manner. Your services were completed in a highly competent, timely manner and costs were also very competitive!

Of particular importance was Westmoreland's conduct during student move-in periods, which oftentimes can be a trying experience for students and their parents. Westmoreland personnel provided services during these critical move-in periods in a diplomatic "can do" manner and the students, parents and University personnel very much appreciated their involvement.

WTW Architects gives Westmoreland Electric high marks for their services at this important residence hall project and looks forward to working with them on future significant projects in our region.

Very truly yours,
WTW ARCHITECTS

Hank Colker, AIA, NCARB, LEED™ AP
Principal
